Got it. I'll send them an email saying we are extending through the end of next week, February 24th (just to be on the safe side). I'll try to get out to Concord later this week or early next week too.

Hi Kara,

There is a limit, another 11 feet or so towards the Butler Buildings, but at this point we are not worried about losing the access road in the interim. If it doesn't cause too much trouble or a barrage of correspondence from the town, then it would be nice to have the flexibility to extend out to Friday with GURR. This would also allow us to get back our PCB analysis from AOI8/9 re-excavations and the access road excavation area we excavated today.

Thank you,
Todd

**** WARNING EXTERNAL SENDER ****

Thank you for the update. Is there a limit on how far we plan to go with this excavation to maintain the road? Do we want to adjust our shipping timeline with GURR?

Hi Kara,

Due to the favorable weather next week, we have decided to re-excavate the northeastern lobe of AOI8 where we have PCB exceedances up against our existing site road starting Monday February 13th.

Let us know if you have any questions.

Ty
Todd

Subject: NMI - AOI8/9

Hi Kara,

My apologies for such a late notice, but Charter is planning on re-excavating AOI8 & AOI9 tomorrow in the locations depicted on the attached figures.

Let me know if you have any questions.

TY
